Mary,

Here's my evaluation matrix. Sorry this is late, I forgot I was going to be at an all day meeting and wouldn't have access to my computer until this evening. Notethat I found inconsistencies in the summation formula for the last column in the version of the matrix I used. I corrected them, so the numbers should be accurate.

Mike

Mike,

Mary has asked if you will be providing her your ranking today. She is consolidating the rankings into a table and will provide that table to you and the rest of the panel for the Friday's discussion.

Please let us know.

Thank you
